Classes, Certifications & Schools

The Acupressure Therapy Institute (ATI) offers a comprehensive professional training in Asian Bodywork Therapy, specifically Acupressure Shiatsu, with separate tracks for Tuina and Medical/Clinical Qigong.

Asian Bodywork Therapy is a healing profession that emphasizes balancing the body’s energy or “Qi” on a physical, mental, emotional and spiritual level. Traditional Chinese Medicine, Japanese Shiatsu and Classical Acupuncture Theory are the foundation for assessment skills and treatment planning.

Acupressure Shiatsu is a blend of Acupressure (which puts more emphasis on specific acupressure points in treatment) and Shiatsu (which focuses on balancing the channels/meridians).

Tuina techniques are used to treat a wide variety of musculoskeletal (orthopedic) and internal organ disorders by opening stagnant meridian channels and encouraging the flow of qi into deficient areas.

Medical/Clinical Qigong refers to a wide series of therapeutic methods, including breath training, psychosomatic exercises, meditation, and guided visualizations that direct the practitioners to create a place of health and balance in their clients.

Adjunct Therapies include, but are not limited to, magnet therapy, mudras, cupping, herbal plasters, liniments and corrective exercises such as Sotai and Qigong.

Graduates of this program will be professional practitioners capable of assessing, evaluating, treating and following the care of the individual. The aim is to develop not only technical expertise but also self-development as a healer. We wish our graduates to be healers in the global sense, able to foster peace and health within themselves in order to share it with others.

ATI is now accepting applications for our 2023-24 Professional Asian Bodywork Therapy training program. To learn more and apply visit our website or contact:

Get to the core — Transform your life! You are on this earth to be happy and realize your true potential.

EMDR ➔ BSP ➔ Hypnosis ➔ Reiki
I use a combination of traditional, body centered and energy therapies to increase the speed and deepen the level of holistic healing.

Psychotherapy clients have reached a point where they know why they feel badly, but don’t know how to release these bad feelings that keep them attached to their old stories and in the past. Using Gentle Reprocessing and other leading edge therapies, I help clients let go of these old stories so they can move on to a happier future.

If you’re a veteran, a first responder, a victim of physical, mental, or sexual abuse, a victim of a disaster, a person with a traumatic background, a person who has anger issues, or a person who is afraid of public speaking, this process could be for you.

Exploring the healing arts in the San Francisco Bay area, I came upon many practitioners who used a variety of modalities. Some combined different techniques in a single session, which worked well for me. Knowing this, I went on to learn many different healing modalities: Chi Nei Tsang, Shiatsu, Reflexology, Craniosacral Therapy, Holy Fire Reiki and my latest healing modality is EM (Eninus Mirus). I have had great success combining these different modalities in various ways.

EM (Eninus Mirus) is a type of healing energy medicine that combines ancient Chinese systems, including acupuncture, feng shui, with modern knowledge of physics and anatomy. EM allows practitioners to diagnose and treat people over long distances. Tapping into Universal Qi for both diagnosing and treating both western diseases and balancing eastern flows.

Holy Fire Reiki is a new form of Reiki, the energy comes directly from source and most who experience it find it to be stronger than other forms of Reiki. Attunements are replaced by Placements and Ignitions and the energy flows directly from Source, as we relinquish control over Reiki energy, we also gain free will to use it.

Craniosacral Therapy using the light touch of CST one uses their hands to diagnose and treat distortions and dysfunctions along the spinal cord. Using soft touch techniques, we release the restrictions in the tissues around the craniosacral system. My journey continues. Perhaps yours will begin, or continue; join me.
